

THIS IS MY DREAM JOB... FILM MAKER & PHOTOGRAPHER

Ivan Ivanov

Introduction

Hello. My name is Ivan. I am a student of the 2nd vocational high school of Galatsi, in Athens. I am finishing school this year and I intend to deal with Cinema. I really like it and it is my dream.

The people involved

Cinema and photography are a way of expression for many people, so it is for me. Through this you can tell the world your own way of thinking and how you see things. From the first series of pictures, galloping a horse with its rider, 1878. The first short film (2.11 seconds), 1888 and The Voyage to the Moon (Le Voyage dans la Lune), one of the first films with a plot (14 minutes), 1902, to this day many people experiment and create through these arts known as the 7th and 8th.

The reason I like it

But the reason I like the 7th art so much is that through it I have learned to express myself. I'm very interested in directing, filmmaking and editing is an exciting process.

The studies

You can study Film maker and Photography by going to a university or a private or public vocational school. Which I intend to do.
