

When i was a little kid i didn't know what to do: in future

Then i came to finland to check out a new culture.

I went to school to learn, so money i can earn.

I tasted the food and it was not that good.
(tai "so good")

My friends want to be doctors and nurses but i don't like to take so long courses.

The school showed me so many choices, i found my future job now i can rejoice.

For my job i will be cutting hair,
it's your turn sit on my chair.
