

my story

When I was in Africa I used to be in the university of applied Social Sciences in bachelor degree in social work. Unfortunately I didn't complete my studies because we had to moved to Finland. and I was hoping to continue with my studies in my profession. but arriving in Finland I started my integration that lasted for 3 years. whereby I started learning the Finnish language that lasted for one year and 6 weeks of the internship in a service home. After that I decided to continue at the preparatory education Vocational training for 10 months where I had improved my language skills even though it was not easy. with the help of my teacher was able to apply in the field of social and Health care still at Careeria.

Even though I always wanted to be a social worker but I had to change to nursing and it is the same as social work because they both involve in helping people and I have always been someone who's looked after others and wanted to help people, rather than helping myself. Then I saw how nursing seemed like the perfect career for me.
